Summer Program Presentation

Thursday, January 19

12:30PM

EEA introduces high school sophomores and juniors to business ownership! The 6-week program is a mixture of learning workshops being taught by local entrepreneurs and internships working in businesses that interest the student AND provide a behind-the-scenes look at business ownership.

Find out more about this amazing opportunity to make connections in the field, gain valuable experience, and enhance your resume for jobs and college applications. PLUS, this could be used as a graduation project! Any graduation project MUST be pre-approved by Ms. Moore, graduation project coordinator, in room 210.

Sign up in the Career Portfolio Google Classroom for a pass to attend.

Power Systems Institute (Rescheduled)

Thursday, January 19

11:15AM

First Energy offers a unique 2-year program that combines classroom learning with hands-on training for students interested in a career as a lineworker or substation electrician. Students who complete the program earn an Associates Degree in Electric Utility Technology. Tuition, books and lab fees are paid for by First Energy for qualified students. A paid summer internship is included.

Sign up in the Career Portfolio Google Classroom to attend this presentation.

Penn State Health St. Joseph's Hospital:

atjandrzejewski@pennstatehealth.psu.edu

Reading Hospital:

CommunityWellness@towerhealth.org.

Submissions that are incomplete and/or are not submitted on time will not be considered.

Presentation Assembly & Activity

Thursday, February 2

10:30AM

Pennsylvania Free Enterprise Week (PFEW) is a summer program that offers in-coming 11th & 12th graders a unique and challenging opportunity to see what it is like to run their own business.

Participants will make up an "imaginary" management team where they will learn first-hand about the Free Enterprise System. Their task - turn their failing company into a financial success! They will develop their own marketing strategies, design a website and in essence, make all of the decisions that are demanded of real life company executives.

Week 1 - July 2-7 (Lycoming College)

Week 2 - July 9-14 (Lycoming College)

Week 3 - July 23-28 (Lycoming College)

Week 4 - July 30-August 4 (Lycoming College
or Penn College of Technology)

(Note that during Week 4 there will be 2 sessions running at 2 different campuses.)

Applications are available at

<https://www.pfew.org/student-application>

Scholarships are available.

The activity for this presentation is part of the Career Portfolio meeting the Career Education and Work Standards required by the Pennsylvania Department of Education and as one part of Tulpehocken's Graduation Project.

This program can be used as a graduation project. Projects must be approved prior to the end of the school year. See Ms. Moore, the graduation project coordinator, in room 210.

Pennsylvania Department of Education:
Career Education and Work Standards

Tulpehocken Area School District follows a set of standards required by the Pennsylvania Department of Education to provide activities in career development and employability skills for our students. Through exploring interests, aptitudes, learning styles, personality traits, career options, as well as high school and post secondary education options, students are able to develop a career plan that best fits who they are as a person. During the fourth quarter, students who are missing any assignments will be scheduled to complete them. The Career Education and Work Standards are characterized into the four following areas:

Career Awareness and Preparation (13.1)

Career Acquisition (13.2)

Career Retention and Advancement (13.3)

Entrepreneurship (13.4)

Career Portfolio and the Graduation Project

Tulpehocken's career education program begins in the elementary schools and continues throughout high school. Activities from the Career Education and Work Standard lessons are collected for each student as part of their career portfolio. The career portfolio is one part of the graduation project, which is requirement for ALL students. See student handbook/course catalog for more detailed information about the graduation project requirement.

The graduation project is worth 1 credit. To obtain this required credit, students MUST complete the following:

- ⇒ Career Portfolio (10 hours)
- ⇒ Graduation Project Experience: Career Development, Personal Development, Community Service or Research (25 hours) **
- ⇒ Written Paper (2 pages)
- ⇒ Oral Presentation (10-20 minutes on designated Saturdays throughout the year)

**** Experiences MUST be pre-approved before beginning! See Ms. Moore in room 210 with any questions and for proposal form.**

Post Secondary Education Lesson: Juniors

As part of the Career Education and Work Standards, juniors will learn about and explore the process for researching and applying for schooling after high school. Whether students are considering to join the workforce, enter the military, or continue schooling immediately after high school, it is important to understand the process of higher education which can include technical training, apprenticeship programs, community colleges, 4-year colleges, and graduate schools.

A Higher Education Night and College Fair will be offered to further assist students and families in the college search process.

The Higher Education Night will be held in the evening for students and their families. We will delve further into exploring schools and the application process, including NCAA requirements for those looking to play sports in college.

Interested juniors will have the opportunity to attend a college fair during the school day at Alvernia College. Over 40 schools and military will be present to share information about their programs. It is a great start to exploring schools, then utilize the summer to visit schools.

Higher Education Night

Thursday, February 15
